Trideo: Empowering Data Driven Decisions for Risk Management Excellence

One platform to manage risk from inception to resolution

Data is the fuel that powers your organization. However, obtaining, consolidating, and standardizing data from different sources can be a roadblock to data-driven decision making. Our comprehensive online platform, Trideo, empowers organizations to effectively use its valuable intel to manage risk from inception to resolution. Trideo also helps ensure compliance with regulatory reporting to the Centers for Medicare and Medicaid Services for MMSEA Section 111 reporting.

Say goodbye to tedious data entry

Trideo's intelligent and dynamic screens adapt to the nature of user response and claim type, eliminating the burden for users to figure out what data to enter and which promotes faster, error-free data entry.

Centralized insurance policy tracking

Easily track various policy layers, including reinsurance policies, with automated real-time policy and reserve erosions and cost allocation across associated cases.

Secure collaboration

Trideo allows key stakeholders, including defense counsel, risk managers, brokers and other interested parties, to collaborate seamlessly on a secure unified platform. Role-based permissions ensures each party has appropriate access to relevant information including depositions, witness summaries, medical records, pleadings.

Effortless reporting

Customizable templates allow users to track progress against goals and surface emerging trends across location, specialty, or case allegation. Real-Time loss summaries provide a comprehensive summary of current and historical losses by policy or accident year, location, insured loss history, and more. Through a point-and-click interface, ad hoc capabilities can tell your story confidently.

Built-In litigation management

Electronic case assignments are made easy along with centralize management of defense panels, rate cards, online invoice adjudication and alternative fee arrangements. Automated legal bill review of legal invoices ensure accuracy of rates, activity dates, and timekeepers' billing. And, detailed legal spend analytics across defense panels and case outcomes.

Seamless integration

Trideo's API interface enables seamless integration with EMRs, Corporate Identity Management (Single Sign-On), and other systems including file management and regulatory compliance reporting to the Centers for Medicare and Medicaid (CMS) Services ensures seamless data submission for compliance with MMSEA Section 111 Reporting and beneficiary verification status.

Take action
