

# Employee benefits analytics Benchmarking capabilities

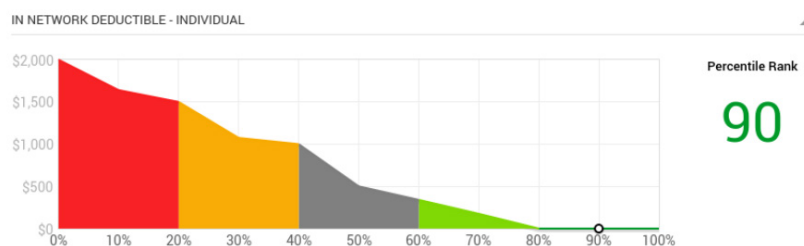

## Know how your plan stacks up.

MMA has serviced and counseled thousands of clients on their employee benefits strategy. A key component to this is benchmarking. Using our internal analytics and data insights team as well as external resources, we'll work together to compare key plan and cost components to help you understand how certain aspects of your benefits program compare to others similar in size or industry.

### With our benchmarking capabilities, you'll be able to:

- Analyze multiple plans including medical, dental, vision, and ancillary
- View real-time benefit plan data from a variety of sources in an easy to read format
- Compare your benefit plans and costs to a custom combination of benchmarks based on region, industry and size
- Ensure your current plans support your long-term benefits strategy

We also utilize tools that analyze your benefit plan features by percentile rank, a distribution of where your benefits rank compared to your competitors.

Our approach keeps the team's objectives in line with our clients' and results in best in class coverage, cost-effective pricing and programs that minimize risk and maximize health for your organization. Key advantages include: early risk identification, effective pre and post claims management, reduced claims and premium cost, robust wellness initiatives and benefits, as well as improved business processes.
