

Mining Industry

A proven, effective approach to insurance, employee benefits and overall risk management.

Mining businesses are often hit hard by the high cost of insurance. It's important to partner with a broker who knows your industry and is working to reduce insurance costs related to mining. We work as an extension of your company to minimize risk and maximize the health of your employees.

What We Do

Workers' Compensation – Safety is the foundation of mining and a critical aspect of workers' compensation programs. We work with a myriad of specialty workers' compensation underwriting companies to create the best approach to safety, claims, medical and overall risk management in the industry.

Employee Benefits – Attracting and retaining the best employees is one of the key deliverables in bringing together a cost-effective program that utilizes employee engagement opportunities and employee wellness initiatives throughout the year. We'll work with you to customize an employee and executive benefits program driven by your employee-base, long-term goals and objectives.

Reclamation Surety – The specialized and highly regulated surety industry for mining and reclamation bonds requires an expert in this area. Our Surety Mining Team takes a unique approach using engineering and mine asset evaluations to supplement traditional credit underwriting. This can become the basis for more aggressive surety credit terms. In addition, our Surety Mining Team provides surety commitments that eases terms and conditions at future milestones. No more hoping for a better deal in the future – it's a commitment.

Aside from these benefits, we provide a variety of property and casualty coverages and solutions:

- Property/Business Continuation
- Financial Analytics
- Safety and Wellness Consulting
- Risk Transfer
- Claims Advocacy
- Compliance Support

MMA brings to light the positive impact the mining industry can have on its employees, their families and the overall environment.
